

A Resolution and the Parameters of the enactment takes a specific structure. The RESOLUTION and the SECTIONS.

The Resolution (This is where you write out the cause and proposed solution):

WHEREAS (What is the basic cause of the concept you're trying to change)

*Example: Unicorns are considered both magical and fictional.*

WHEREAS (More support for the change you're advocating, usually in the form of a benefit to a change.)

*Example: Believing in Magic is good for the soul and the happiness of citizens.*

WHEREAS (The problem you're going to change)

*Example: Too many American citizens fail to believe in magic.*

WHEREAS (If you have an additional problem associated with your Bill, write it here)

BE IT RESOLVED (Here's where you're going to state what it is that you're advocating)

*Example: that this Congress will commission an expedition to search for and find unicorns in the United States.*

Be sure you know what the results of enacting your Bill will be, specifically the intended effects.

*Example: This will bring proof of magical existence to the citizens of the United States, and perpetuate it's belief among our citizens, increasing quality of life and happiness.*

Now you've got your resolution and it's time to lay out the parameters of the bill. You need to figure out the funding, penalties, and end with when the bill goes into effect. This is where you figure out the practicalities.

SECTION 1 (What you want the bill to be)

*Example: An expedition will be sanctioned with the intention of proving the existence of Unicorns in the United States.*

SECTION 2 (additional parts of the enactment)

*Example: The Expedition Team will be composed of a cryptozoologist, a veterinarian, and a wildlife photographer.*

SECTION 3 (Where the funding comes from)

*Example: The Expedition will be funded through FIAT by Congressional decree.*

SECTION 4 (Additional Information about the Bill - if any)

*Example: The Expedition Team will be overseen by the Environmental Protection Agency*

SECTION 5 (Penalties to those that fail to follow the new law)

*This section is not relevant in this particular example.*

SECTION 5 (The timeframe for the Bill)

*Example: The Expedition will begin as soon as possible.*
